

## SAP Business Intelligence (BI)

With fluctuating global market demands, varying costs, competition, etc enterprises are compelled to find business solutions quickly in order to survive and thrive. BI is the set of technologies and practices used to help an organization acquire a better analysis and understanding of the overall business and market state through in depth analysis of corporate data. BI through its multi dimensional representation of relevant organizational data presents the appropriate context for management to aid in their critical decision making.

Ananth offers BI services to integrate both structured and unstructured and heterogeneous data and support decision making by ensuring that this collated data is delivered at the right time, to the right person in the right format. Developed applications support reporting, OLAP, analytics, data mining, business performance management, benchmarks, text mining, and predictive analytics.

### BI Competencies

#### BI Strategic Assessment

Ananth investigates and analyses the enterprise's business intelligence needs, performs a gap analysis, reviews the options available and ultimately makes a recommendation on the optimum roadmap to deliver your BI requirements.

#### SAP BI Technology Assessment

Utilizing Ananth's broad knowledge of SAP BI and the general BI market the service enables enterprises to determine the best-fit SAP BI solution for their enterprise needs.

#### SAP BI Implementation Services

Ananth provides full life-cycle services capability from scope definition, to architecture, design, development, go-live and application support.

#### SAP BI User Adoption Services

Low end-user adoption of Business Intelligence solutions constrains the enterprise's ability to gain the maximum benefit from investment. The deliverable is a tailored program that provides training, knowledge and support to enable increased competency and understanding in the end-user community. Typical benefits include reduced IT support costs and increased productivity of information consumers.

### BI Implementation Services

Ananth's SAP BI practice provides data warehousing solutions that allow your enterprise to instantly create and deploy graphical, interactive reports and applications for all user types at every organizational level. Ananth's BI implementation services portfolio include:

- Data Modeling, Extraction and Reporting
- Performance Management
- SAP Integrated Planning
- SAP Analytics - Modeling with Visual Composer
- Crystal Reporting
- Xcelsius for Dashboards
- BI integrations with BO, Oracle BI (OBIEE), Microsoft BI (MSBI), SharePoint.

## Key Engagements

### SAP BI implementation for a Pharma Major

The enterprise challenges included:

- Tracking over-head costs for financial managers
- Need to facilitate management and production departments by analyzing shop floor activities with forecasts,
- Setting up ability to track variances and overheads in production and manufacturing,
- Designing additional reporting to help managers interpret quality and performance with forecasts using rich analytic capabilities.

Ananth implemented a comprehensive SAP BI solution for production planning and overhead cost controlling. Data extraction was sourced from SAP R/3 PP and FI/CO modules and reported for variance analysis and overhead cost controlling as well as ETL objects and process chains to extract data (daily/ weekly).

### Implementation of SAP BI for an MNC

In order to gain economies of scale from its operations, the MNC established a global supply chain organization to look at its strategic planning process and embarked on an information strategy to provide end-to-end “visibility” into its supply chain as it related to the strategic capacity planning process.

Ananth SAP BI solution provided an enterprise-wide set of robust Extract, Transformation and Load (ETL) as well as data quality capabilities in order to standardize, consolidate and align the data from both the numerous non-SAP data sources as well as the SAP data sources.

In addition, the BusinessObjects Metadata management capabilities allow data lineage analysis to be performed.

## Ananth SAP Offerings

### Implementation

End to end Implementation. Competencies in HCM, FI/CO, Logistics, BI and CRM

- Rollouts
- System and Data Migration
- Testing
- System Integration (using SAP Net Weaver)

### Upgrade Services

- Upgrade Assessment and Deployment

### Sustenance Services

- Functional and Technical Support
- Maintenance
- Independent SAP Audit & Validation Services

### Other Services

- Custom Application Development
- Testing
- Performance Engineering
