

SAP NetWeaver

NetWeaver is an integrated technology “stack” that enables your organization to unify people, knowledge and processes in an Enterprise Services Architecture, providing your organization with the agility and flexibility required in today’s high flux business environment. Your organization can leverage NetWeaver for “focused” solutions such as Enterprise Portals, BI, and Master Data Management to help solve specific “pain points,” and/or for the architectural foundation for your entire IT landscape.

The flexible architecture, collaborative capabilities, and integration capabilities enabled through the NetWeaver platform technology make it easier to extend the reach of your business processes - both within your organization and across your entire business ecosystem of customers, suppliers and business partners – with a lower total cost of ownership.

Ananth, over the years, has built a proven record of success deploying Enterprise Portal (EP), Business Intelligence (BI), and integration solutions and strategies leveraging NetWeaver technology.

NetWeaver Competencies

The Ananth team will help clients realize true NetWeaver potential through its strong service offerings:

- Process Integration; *for effective SAP landscape harmonization and consolidation*
- Business Intelligence; *for better insights into business metrics and enhanced decision making*
- Enterprise Portal; *for self services and multi channel information dissemination*
- Master Data Management; *for data consolidation and cleansing*
- Service Oriented Architecture (SOA) with NetWeaver
- Netweaver - ABAP development, enhancements, maintenance and production support
- Advanced ABAP Offerings (Web Services, Workflow, Adobe Forms)

Value Proposition

- Ananth can help you determine which of the available NetWeaver components are best for you and what your deployment options are given your current business needs
- We understand the future direction of the entire SAP solution suite (including R/3 Enterprise, NetWeaver, and Extended solutions) as applicable to your IT architecture and business strategy
- Understand how NetWeaver can be leveraged to bring greater value to your R/3 Enterprise upgrade
- Educate clients about the business improvement opportunities and potential TCO impacts by moving to an enterprise services architecture (ESA) based on NetWeaver technology and implement based on these ESA principles
- Identify value drivers and improvement opportunities in the areas of supply chain, sales/customer relationship management, self service, and collaboration
- Identify starting-points, pilots, and quick wins to begin leveraging NetWeaver

Key Engagement

A reputed, leading defense organization had implemented SAP for tighter streamlining and integration of their HR, Financial and Procurement processes. Ananth empowered them further by replacing their basic intranet with SAP NetWeaver Enterprise Portal (SAP EP). EP was initially enabled as a presentation layer into their R/3 Financial reports.

A little later, Ananth further enhanced the portal to offer both Employee Self Service (ESS) and Manager Self Service (MSS) functionality out of their SAP HR system. This empowered employees with relevant Human Resources information and ability to perform routine HR tasks through the SAP EP, something which was not available before. Additionally, Ananth implemented BI to enhance their SAP R/3 reporting, and change the way they manage their financial closing processes. SAP BI was also enabled to allow reporting from the Human Resources system.

Some of the immediate benefits, post implementation included:

- Improved financial qualitative and quantitative insights
- Increased user satisfaction with financial reporting
- Empowered employees to perform routine HR tasks
- Improvements in payroll processing
- Line of Business: Report timeliness went from 7-14 days after month end close to immediate
- 200-300% decrease in Portal content development times

Ananth SAP Offerings

Implementation

End to end Implementation. Competencies in HCM, FI/CO, Logistics, BI and CRM

- Rollouts
- System and Data Migration
- Testing
- System Integration (using SAP Net Weaver)

Upgrade Services

- Upgrade Assessment and Deployment

Sustenance Services

- Functional and Technical Support
- Maintenance
- Independent SAP Audit & Validation Services

Other Services

- Custom Application Development
- Testing
- Performance Engineering

About Ananth

Ananth Technologies, an AS 9100B & ISO 9001:2000 certified firm has been serving the IT business and technical needs of its Global 1000 clientele since 1992. Ananth is a certified SAP Channel Partner.

Based both in US and India, Ananth has a global presence with a workforce of over 750. Our varied clientele are leaders in the areas of Aerospace, Mining, Pharma, Higher Education, Public Sector, Manufacturing and Health care.

In a time when companies are relentlessly pushing to compete better, Ananth is the global technology partner with a single-minded passion: dedicating its systems expertise to transform your business.
