

SAP Logistics Expertise

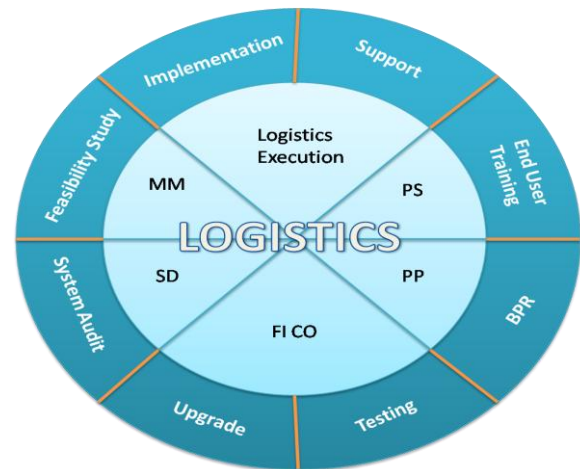

The complexity and intricacies of managing various supplies from different vendors, managing production processes, tracking inventory and providing finished products to customers in an increasingly globalized supply chain requires robust and responsive Logistics. Enterprise logistics include the areas of inventory management, purchasing, transportation, warehousing, sales and distribution.

Ananth understands that quality and relevance of an organization's logistical systems ensures appropriate products in right quantities, at the right prices, at the right place on time. This makes the difference between the product's failure or survival or being a market hit. Ananth over the years, working with customers in Aerospace, Pharma and Manufacturing and implementing their systems has built expertise and a solid reputation as a comprehensive and competent logistics solutions provider.

Logistics Competencies

Ananth offers comprehensive SAP Logistics Consulting, Implementation and Support services in:

- Materials Management (MM)
