

Oracle @ Ananth

Contemporary businesses face daunting challenges. To meet demands, long-term goals require ongoing IT growth and innovation. At the same time, budget and resource allocations must be vigilantly managed. Every product, system, and resource must perform at the highest possible level to keep your organization viable and competitive. Every decision has business and budget impact, and the spend on IT should result in faster ROI. Your IT solutions should be tailored for your specific needs, because your challenges are unique.

Ananth' Oracle practice combines people, processes and technologies to deliver tangible business impact and helps maximize enterprise systems utility. We combine process and IT expertise, to help Oracle users focus on business improvements in a quick and cost-effective manner.

Ananth' end-to-end service offerings for the Oracle practice include Process Consulting, Implementations, Global Rollouts, Testing, Change Management, Upgrade Services, Integration Services, End-to-End Planning and Budgeting, Post Implementation Support and Strategic Assessments.
